Guidelines for the Administration, Disbursement, Monitoring and Fund Management of the Basic Healthcare Provision Fund

Federal Ministry of Health (FMOH), National Health Insurance Scheme (NHIS) and the National Primary Care Development Agency (NPHCDA)

August 2016
TABLE OF CONTENTS

1 INTRODUCTION ........................................................................................................................................... 15
  1.1 Rationale for selected interventions in Basic Minimum Package of Health Services ...................... 16
  1.2 Purpose of the Guidelines ....................................................................................................................... 18
  1.3 Establishment of the Fund ........................................................................................................................ 19
    1.3.1 The Fund ......................................................................................................................................... 19
    1.3.2 Contributions into the Fund .............................................................................................................. 19
    1.3.3 Disbursement of the Fund ............................................................................................................... 20

2 ADMINISTRATION OF THE FUND .............................................................................................................. 21
  2.1 Key Stakeholders .................................................................................................................................... 21
    National Council on Health (NCH) ........................................................................................................... 21

DEFINITIONS

**Actuary**: a statistician who calculates risks and probabilities for a payment plan

**Administrative Charge**: amount set aside to run the operations of the NHIS and NPHCDA Gateways which shall not exceed 10% of the BHCPF

**Affordability**: the ability to pay for health services so people do not suffer financial hardship when using them. This can be achieved in a variety of ways including access to essential medicines and technologies to diagnose and treat medical problems, sufficient capacity of well-trained, motivated health workers to provide the services to meet patients’ needs based on the best available evidence

**Benefit**: this means a benefit or advantage of any kind derived from a Scheme

**Capitation**: A payment method in which all providers in the payment system are paid, in advance, whether the enrolee uses the services or not, a predetermined fixed rate to provide a defined set of services for each individual enrolled with the provider for a fixed period

**Catastrophic Spending** (for each individual/household): occurs when hospitalisation spending for that person/household as a proportion of ability to pay (household consumption spending less combined survival income for all household members) exceeds a certain threshold. The threshold value can range from 5 to 40%

**Civil Society Organisations (CSO)**: The multitude of associations (usually Non–Governmental Organisations, NGOs and institutions) that reflect the interests and will of citizens through advocacy and represent the interests of the citizens

**Community Based Health Insurance Scheme (CBHIS)**: a form of voluntary, not–for–profit insurance mechanism that often involves some form of community management. CBHIS schemes are typically based on a collective entity defined by geographic, professional, or religious affiliations

**Conditional Cash Transfers (CCT)**: monetary transfers to households on condition that they comply with pre–defined requirements

**Cost Effectiveness Analysis (CEA)**: the economic cost of a health intervention is divided by an estimate of the health effects; the interventions with the smallest ratios are considered to be the most cost–effective. CEA is a tool for identifying which health interventions achieve the greatest level of health impact per unit of
investment, and the results can be used to evaluate on-going health interventions or to plan for future health programs.

Decentralised Financing for Accountability and Results (DFAAR):

**Electronic Medical Records**: digital version of a paper record that contains all of a patient's medical history with the health care provider including diagnosis, treatment and medical services rendered

**Enrolee**: An eligible person who is enrolled in a health insurance scheme health plan or the eligible person's qualifying dependent

**Faith Based Organisation**: public or private organisation consisting of individuals united on the basis of religious or spiritual beliefs and directing their efforts toward meeting the spiritual, social, and cultural needs of the members of their community

**Fee–for–service (FFS)**: a payment model of payment per service rendered to an enrolee by a health care provider for health services not classified under capitation

**Financial Catastrophe**: High out-of-pocket payments for health services in the presence of low household financial capacity and an absence of prepayment mechanisms results in financial catastrophe. This high expenditure for health care result in households or individuals reducing or becoming unable to pay for necessities like food, clothing and even education of children

**Fiscal Space**: The availability of budgetary room that allows a government to provide resources for a desired purpose without any prejudice to the sustainability of a government's financial position. Usually, in creating fiscal space, additional resources can be made available for some form of meritorious government spending

**General Government Expenditure on Health**: The sum of outlays by government entities to purchase health care services and goods. It comprises the outlays on health by all levels of government, social security agencies and direct expenditure by parastatals and public firms. Besides domestic funds, it also includes external resources passing through the government as grants or loans, channelled through the national budget

**General Government Expenditure**: This is the total amount expended by a government and is a reflection of the total expenditure that the government needs to finance from revenues generated such as taxes, economic income and borrowed funds. Current government expenditure including purchasing goods and services, wage bill, national defence, security and health are all included
**Gross Domestic Product per Capita:** is gross domestic product divided by the mid-year population. GDP is the sum of gross value of all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources.

**Health Care Provider:** these are any government or private health care facility, hospital, maternity centre, community pharmacies and all other service providers, accredited for the provision of prescribed health services for insured persons and their dependents.

**Health Maintenance Organisation (HMO):** A limited liability company formed by private or public establishments or individuals, to facilitate the provision of preventive and other health care services to a defined group of enrollees and financed by pre-paid employer–employee insurance premium payments. Care is provided by participating health providers and all parties are bound by agreements.

**Independent Verification Agent (IVA):** An entity whose function is to ensure that only verified outputs are reimbursed, through (a) certifying that the contractual outputs, as reported by the service provider, have been physically delivered and that pre-agreed standards of service have been achieved, and (b) validating the service provider’s reimbursement request (performing cost reconciliation by multiplying the quantity of outputs achieved by their unit cost), and recommending to the funding entity to honour payment.

**Local Government:** public administration at local level exercised through representative councils established by law, exercising specific powers within a defined geographical area. These powers give the Local Government substantial control over local affairs as well as the staff to direct the provision of services and implement projects, which complement the activities of the State and Federal Governments.

**Medical Documents:** these include all prescriptions, laboratory forms, excuse duty, death certificate and other documents used in the management of patients.

**Medical Practitioner:** a person with a medical related degree registerable with the Medical and Dental Council of Nigeria.

**Mutual Health Association:** a privately or publicly incorporated non-profit organisation formed on the basis of solidarity and collective pooling of health risk by community members and governed by the constitution/bylaws. Run by a Board of Trustees (BoT) elected by members while members take part in its management.
**National Health Insurance Scheme (NHIS):** the social health insurance scheme in Nigeria established by the National Health Insurance Scheme Act of 1999 of the Federal Republic of Nigeria Laws No. 42 VOL II 2004

**Per Diem:** A method of reimbursing a health provider based on a fixed rate per day rather than on actual charges. It is usually uniform irrespective of degree of care

**Pooling:** the accumulation and management of revenues so that members of the pool share collective health risks, thereby protecting individual pool members from large, unpredictable health expenditures

**Primary–Level Facility:** typically staffed by general practitioners and/or nurses with limited laboratory services for general but not for specialised pathological analysis; bed size ranging from 0–20 beds; often referred to as first level referral

**Private Expenditure on Health:** This includes direct household (out–of–pocket) payments, private insurance, charitable donations, and direct service payments by private corporations

**Provider Payment Mechanism:** the mechanisms used to transfer payments for services rendered from the purchaser or a proxy to the health care provider. The Provider Payment Mechanism accomplishes far more than simply the transfer of funds to cover the costs of services

**Public Private Partnership (PPP or P3):** a legally–binding contract between government and the private sector for the provision of assets and the delivery of services that allocates responsibilities and business risks among the various partners. The goal is to combine the best capabilities of the public and private sectors for mutual benefit

**Secondary–Level Healthcare Facility:** Highly differentiated by function with five to ten clinical specialities; bed size ranging from 20–100 beds; often referred to as Specialist Hospital

**Social Health Insurance Scheme:** a health insurance scheme provided by government to its citizens, especially to low and middle income populations.

**Specialist Care:** This is care provided by secondary–level healthcare facilities. Such care focuses on specific organs or diseases (cardiology, neurology, oncology etc) including special diagnostic and therapeutic services such as biopsy or dialysis.
**Strategic Purchasing:** This is the planning and purchasing of preventive, curative and rehabilitative clinical services to meet the health needs of a population.

**Tertiary-Level Healthcare Facility:** Highly specialised staff and technical equipment, (Cardiology, Intensive Care Unit ICU and specialised imaging units); clinical services are highly differentiated by function; might have teaching activities; bed size ranging from 100–800 beds; often referred to as Teaching or Tertiary level hospital.

**Third Party Administrator:** this is either a For-Profit or Not for Profit organisation with expertise and capability to administer all or a portion of the insurance claims process. They are usually contracted to also administer services including claims administration, premium collection, enrolment and other administrative activities.

**Total Expenditure on Health:** The sum of public and private health expenditure that covers the provision of health services (preventive and curative), family planning services, nutrition activities and emergency aid designated for health.

**Universal Health Coverage:** a process that ensures all people have access to needed promotive, preventive, curative and rehabilitative health services, of sufficient quality to be effective, while also ensuring that people do not suffer financial hardship when paying for these services.

**User Fees:** charges levied on any aspect of health services at the point of delivery.

**Vulnerable:** this refers to the following categories of people (a) pregnant women, (b) children under five (5) years (c) the elderly >85 years, (d) the disabled, (e) the poor (to be and others falling within the group)

---

**EXECUTIVE SUMMARY**
These set of Guidelines define the basis for Administration, Disbursement, Monitoring and Financial Management (ADMFM) of the Basic Healthcare Provision Fund (BHCPF, “The Fund”). They set out the processes to be applied, the responsibilities of various stakeholders including (but not limited to) participating healthcare providers, healthcare facilities, Federal Government parastatals [National Health Insurance Scheme (NHIS), the National Primary Care Development Agency (NPHCDA), Federal Road Safety Corps (FRSC), National Emergency Management Agency (NEMA, Nigeria Police Force (NPF)]; State Governments, Local Governments and their participating agencies including State Primary Health Care Development Agencies (SPHCDAs) and the accompanying accountability expectations contingent on these responsibilities.

**Guidelines ensure the Fund supports current health priorities**

These Guidelines have been drawn up with specific reference to the National Health Act 2014, directives from the Minister of Health, alignment with national health policy and following wide-ranging consultations with all relevant stakeholders in the Nigerian healthcare sector. In particular, the Guidelines address urgent interventions put in place to tackle persistent and emerging causes of population mortality in Nigeria including Maternal Mortality, Perinatal Mortality and Road Traffic Injuries (RTIs). They define the minimum performance standards stakeholders are expected to adopt, implement and comply with to meet stipulations set out in these Guidelines. They also provide a framework for realising the strategic objective of the health sector and is consistent with the broader goal of achieving Universal Health Coverage (UHC) for all Nigerians.

**Fund guarantees equity and access for improved outcomes**

The overriding objective for the development of these Guidelines was ensuring efficient disbursement of the Fund to services, which catalyse improved health outcomes. This will be achieved, initially (in the first five years) through the targeting of specific areas of national concern including Maternal and child Health, Immunisations and selected Non-Communicable Diseases, including Road Traffic Injuries (RTIs). Emphasis was also on the ease and speed of implementation, safeguarding quality in health service delivery as well as entrenching a robust accountability and probity framework, to guarantee prudent financial management of public funds.
As specified in the National Health Act 2014, the Fund will be utilised primarily for three purposes:

(a) To pay for provision of a Basic Minimum Package of Health Services (BMPHS) as defined
(b) To fund operational expenses of Primary Healthcare Centres (PHCs) across Nigeria and
(c) To fund the provision of basic Emergency Medical Treatment, initially targeted at care for Road Traffic Injuries (RTIs), arising from “accident hot-spots” across Nigeria

The process through, which disbursement and claims are funded have been designed in line with the provisions of National Health Act 2014. The “NHIS Gateway”, is the mechanism by which 50% of the BHCPF will be disbursed. The Provider Payment Mechanism for this process is a modified fee-for-service route or “Global Payments”. The other pathway through which 45% of the Fund will be disbursed is known as the “NPHCDA Gateway” which will utilise the Provider Payment Mechanism, which is known as “Decentralised Financing for Accountability and Results (DFAAR)”. This is a modified form of the more recently established “Decentralized Facility Financing” (DFF) or “Results-Based Financing” (RBF) process. All payments shall be made on a quarterly basis, subject to the State Fund Administrator (SFA) and Ministerial Fund Oversight Committee (MFOC) receiving monitoring and quality assurance data. The “Emergency Medical Treatment Gateway” is the pathway through which 5% of the BHCPF set aside to provide for Emergency Medical Treatment will be disbursed through a mechanism similar to the NHIS Gateway. All payments shall be made on a monthly or quarterly basis, in arrears, subject to approval of the Ministerial Fund Oversight Committee (MFOC) on receipt of monitoring and quality assurance data.

**Approach to the NHIS Gateway – Funded basic minimum package anchored on free maternal healthcare.**

The NHIS Gateway is intended to establish a system, which facilitates the expansion of the Basic Minimum Package of Health Services (BMPHS) as Government revenues increase. The Basic Minimum Package of Health Services for Nigeria in 2016 will consist of nine (9) interventions in total; four (4) for aspects of Maternal Health, care for children under five (malaria, vaccine preventable diseases), two for Non-Communicable Diseases (Hypertension and Diabetes), and emergency treatment of road traffic injuries. There is a challenging economic climate in Nigeria and for 2016, the Fund will only amount to about ₦225 per capita. Health resources are always finite and no government can provide all health services to meet all the
needs of its population therefore, choices have to be made. The huge impact of maternal and infant morbidity and mortality on the disease burden in Nigeria has necessitated prioritisation of cost–effective interventions to reduce their burden. This is the cornerstone of the basic package of services and will be delivered to all pregnant women, in all rural areas of Nigeria, free of charge. Routine immunisation of children remains a key challenge and is now exacerbated with recent limits on funding by donors. The Fund will thus be used in filling some of the gaps in the fiscal space for immunisation.

Approach to the NPHCDA gateway – Key Stakeholders include State Governments and their agencies

The National Health Act 2014 confers specific responsibilities on public–sector agencies to fulfil certain functions in administration of the Fund. The Guidelines stipulate the precise roles and duties of these key public–sector bodies. State Ministries of Health (SMoH) provide leadership at State level and ensure successful implementation of the initiative in each State. The Commissioner of Health will appoint the “State Fund Administrator” (SFA) as well as ensure there is a fully functional State Primary Healthcare Development Agency (SPHCDA). For a defined period of five (5) years commencing after approval of these Guidelines, each State shall make annual budgetary provisions for operational expenses in Primary Healthcare Centres (PHC), which shall be reflected in the annual SPHCDA budget. Each participating State Government (and the FCT), through its SPHCDA shall sign a Memorandum of Understanding (MoU) with the Ministerial Fund Oversight Committee (MFOC) to govern its participation in the initiative including estimated amounts allocated for disbursement, reporting obligations, service–level agreements (SLAs) and reporting requirements. The NPHCDA Gateway will entail direct electronic transfer of funds from the CBN account to designated accounts of the SPHCDA (who serve as “pass–throughs”) for onward transfer to the bank accounts of individual health facilities so that these facilities have the resources needed to meet their operating requirements. The health facility in–charge and the chair of the Ward Development Committee will control the funds. The health facilities will enjoy substantial autonomy in how they use the funds so long as they are used to strengthen the delivery of primary health care (PHC).

Approach to the Emergency Medical Treatment (EMT) Gateway – Key Stakeholders in providing basic care for Road Traffic Injuries (RTIs)
The National Health Act 2014 stipulates that five (5%) per cent of the Fund shall be used to provide Emergency Medical Treatment (EMT) to all Nigerians. The responsibility for administration of this portion of the Fund is vested in a Committee [the Emergency Medical Treatment Committee (EMTC)], which will be the MFOC. Emergency Medical Treatment (EMT) covers a spectrum of activities including (a) Pre–Hospital Care & Transport (b) Initial Evaluation (c) Resuscitation and (d) In–Hospital Care. In this context, Emergency Medical Treatment (EMT) will apply to, Surgical Emergencies related to road traffic accidents.

For purposes of these guidelines and the operation of the 5% gateway, the MFOC is the EMTC.

The Ministerial Fund Oversight Committee shall manage the Fund

In the National Health Act, the Minister of Health is given responsibility for providing stewardship, ensuring good governance and safeguarding fiduciary prudence. The Minister will appoint the members of a Ministerial Fund Oversight Committee (MFOC), which will provide the oversight on the implementation of the Fund on behalf of the Minister. The NCH will have the power to ratify (or not) the members of the MFOC. The role of the MFOC will include: (i) recruitment, appointments, and management of independent verification agents and auditors; (ii) authorizing payments to States and third party administrators; (iii) approving and standardizing service level agreements; (iv) providing redress for providers, patients or communities who have complaints about the implementation of the fund, etc. The MFOC shall also ensure that Administrative Expenses and Costs for all aspects of implementation of the Fund, do not exceed the set ceiling of five (5%) percent of the Fund.

Guidelines employ innovative, public and private sector–led processes

The Fund will make payments, for care delivered, to all (both public and private sector) accredited providers, in all States (and FCT) of the Federation. Independent verification of utilisation of services would be conducted through Independent Verification Agents (IVAs) using random samples and customer surveys, both from a central call centre and also through home visits. Periodic random samples will be interviewed to verify that care given was appropriate, up to the expected standards and was associated with quality outcomes. Annual audits of accounts will be carried out by a reputable firm and results published publicly.

These Guidelines will be reviewed regularly, to keep pace with both clinical and fiscal developments. As presented, they represent the distillation of international best practice adapted for local solutions and should serve as a beacon in the
1 INTRODUCTION

The National Health Act (NHA) No. 8 of 2014 was enacted to ensure improved health outcomes, to provide a legal framework for the provision of health care services and to establish an organisational and management structure for the health system in Nigeria. To achieve this important objective of providing quality healthcare services to all Nigerians, the Act specifies that all Nigerians shall be entitled to a Basic Minimum Package of Health Services (BMPHS). The "Basic Minimum Package" is a set of preventive, protective, promotive, curative and rehabilitative health services or interventions, published from time to time by the Minister of Health, after consultation with the National Council on Health (NCH).

The Basic Health Care Provision Fund (BHCPF or “The Fund”) was established under Section 11 of the National Health Act, as the principal funding vehicle for the BMPHS, whilst at the same time, serving to increase the fiscal space and overall financing to the health sector. It is expected that the attendant service upscale arising from application of this funding, would assist Nigeria achieve Universal Health Coverage (UHC). Funding of this BHCPF would be derived, as stipulated in the Act, from contributions including (a) an annual grant from the Federal Government of Nigeria of not less than one per cent (1%) of its Consolidated Revenue Fund (CRF); (b) grants by international donor partners; (c) funds from any other source.

The NHAct sets out the important drivers to guide disbursement of the BHCPF. These “Payment Gateways” are three–fold:

(a) Fifty (50%) per cent of the Fund shall be disbursed through the National Health Insurance Scheme (NHIS) and deployed towards the provision of the Basic Minimum Package of Health Services (BMPHS) in eligible primary or secondary health care facilities;

(b) Forty five (45%) per cent of the Fund shall be disbursed through the National Primary Health Care Development Agency (NPHCDA) and deployed to strengthening Primary Healthcare Centres (PHCs) in eligible primary healthcare facilities (essential drugs, vaccines and consumables; provision and maintenance of facilities, equipment and transport; development of human resources); and

(c) Five (5%) per cent of the Fund shall be disbursed through a Committee appointed by the NCH and deployed towards emergency medical treatment.
Primary Health Care (PHC) is the foundational basis for the provision of healthcare services in Nigeria and this fundamental role is recognised by the Act in a series of Sections (3 and 11), designed to strengthen PHC. The current administration has also, in setting out its healthcare agenda, centred it around the provision of functional primary healthcare services in all political wards of the federation, with the ultimate objective of ensuring Universal Health Coverage (UHC) for all Nigerians. The BHCPF is key to achieving this agenda as well as expanding the fiscal space for health in Nigeria.

1.1 Rationale for selected interventions in Basic Minimum Package of Health Services

The Basic Minimum Package of Health Services (BMPHS) for Nigeria (2016) shall consist of nine (9) interventions; Urinalysis screening test and a Cardiovascular Disease (blood pressure, BP check) for all Nigerians, four (4) for Maternal Health interventions for pregnant women, child care for children under five (malaria and vaccine preventable diseases) as well as Emergency Medical Treatment for Road Traffic Injuries (RTIs).

A Basic Minimum Package of Health Services (BMPHS) is typically deployed to meet the elementary health needs of the entire population in countries where resources are limited. By aggregating services together, the BMPHS minimises costs, both of the services as well as for patients to receive the services.

Health spending rarely matches demand and overall disease burden. This means that the demand for health services does not equal the supply of health services. As resources are always finite, there is no country that can provide health services to meet all the possible needs of its population; therefore countries have to prioritise which services to provide.

In 2016 the Fund will amount to about N225 per person per year. The current economic climate in Nigeria is challenging. To continue to fund healthcare services adequately going forward, the Government will have to consider radically new options. Tough choices have to be made including a review of the current system of annual allocations to public facilities, a reorientation in disease burden priorities, efficiency savings to reduce costs and increased private sector participation, especially in the delivery of care. All of these factors were taken into consideration as part of this process of defining a minimum package of services.

Determinations on actual interventions for the BMHPS content were informed by inclusion criteria such as: (a) most prevalent disease burden (b) cost–effectiveness and/or (c) equity. The World Bank has designated health interventions that cost less
than US$100 per year of life saved as highly cost-effective for low and middle-income countries.1

Difficulties faced by women in association with childbirth remain a significant cause for concern, brought into sharp focus by the very high Maternal Mortality Ratio (MMR) in Nigeria estimated at 576 per 100,000 births.2 More than seventy percent (70%) of maternal deaths can be attributed to five major complications: (a) haemorrhage, (b) infection, (c) unsafe abortion, (d) hypertensive disease of pregnancy and (e) obstructed labour.3 Given the huge impact of maternal morbidity and mortality on the disease burden in Nigeria, cost-effective interventions/services, which are likely to reduce the MMR have been prioritised in the Basic Minimum Package of Health Services.

Road Traffic Injuries (RTIs) are emerging as the leading public health concern in sub-Saharan Africa, against a backdrop of population health transitioning away from infectious diseases in children to non-communicable disease and injuries in adults. Nigeria has the highest road injury death rate (52.4 per 100,000 people) of any country globally.4 The pedestrian death rate in West Africa at 13.4 per 100,000 and motorcyclist death rate at 17.5 per 100,000 are the highest in the world. In 2010, Nigeria had over 75,000 Road Traffic Injury fatalities, approximately thirty (30%) percent the total for sub-Saharan Africa.5 Road Traffic Injury deaths in Nigeria ranked ahead of neonatal sepsis, preterm birth complications, protein-energy malnutrition, neonatal encephalopathy and meningitis, which are the most important causes of infant mortality. Similarly, Road Traffic Injury deaths in Nigeria killed more than three times as many people as Maternal Disorders and almost twice as many people as Tuberculosis. Road Traffic Injuries are now the fifth leading cause of death in Nigeria, up from eleventh in 1990.6 The additional justification for reducing deaths from RTIs is the Sustainable Development Goal (SDG) 3.6: “Halve the burden due to global road traffic crashes by halving the number of fatalities and serious injuries by 2030 compared to 2010”.

As specified in Section 3 (3) of the National Health Act 2014, all Nigerians shall be entitled to a Basic Minimum Package of Health Services. To ensure that at least some, if not all interventions specified in the BMPHS are available to all Nigerians

---

8 Sustainable Development Goals. New York, United Nations 2015
irrespective of age, religion, circumstances, domicile or health status, interventions directed against Hypertension (High Blood Pressure, HBP) which is the most common cardiovascular condition in Nigeria [prevalence rate between twenty two and twenty nine percent (22%-28.9%)]\textsuperscript{9,10} a urinalysis test for Diabetes\textsuperscript{11} and Emergency Medical Treatment for Road Traffic Injuries, are included.

Whilst other services may become available in due course as a result of other initiatives, vertical programmes, private or community effort, these should be designed and implemented to complement and not act as substitute for the interventions contained in this BMPHS.

1.2 Purpose of the Guidelines

These Guidelines have been drawn up with explicit reference to the National Health Act, directives from the Minister of Health and following wide-ranging consultations with all relevant stakeholders in the Nigerian healthcare sector. They define the requirements for Administration, Disbursement, Monitoring and Financial Management (ADMFM) of the Fund. All stakeholders including (but not limited to) participating healthcare providers, healthcare facilities, Federal Government parastatals [National Health Insurance Scheme (NHIS), the National Primary Care Development Agency (NPHCDA), Federal Road Safety Commission (FRSC), National Emergency Management Agency (NEMA)]; State Governments, Local Governments and their participating agencies including the State Primary Health Care Development Agencies (SPHCDAs) and States Supported Health Insurance Schemes (SSHIS); are expected to adopt, implement and comply with the stipulations set out in these Guidelines.

The overriding strategic objective of these Guidelines is to ensure that utilisation of the Fund catalyses improved health outcomes. This will be achieved through explicit targeting of specific areas of concern including maternal health and non-communicable diseases. During the development of the Guidelines, great emphasis was been placed on the ease and speed of implementation, safeguarding equity in health service delivery across Nigeria as well as entrenching a robust accountability and probity framework, which guarantees the prudent financial management of public funds.

Specifically, the primary purpose of these Guidelines is to:

\textsuperscript{11}
(a) Set out the criteria for administration, disbursement, monitoring and financial management of the Basic Health Care Provision Fund as provided under Section 11 of the National Health Act;

(b) Specify the eligibility requirements, terms of participation and attendant responsibilities for parties to access the Fund;

(c) Stipulate the procedure for financial management of surplus funds at the end of each financial year;

(d) Set out the requirements to be met by beneficiary health facilities;

(e) Enumerate the course of action for all other matters, which would ensure that the Basic Health Care Provision Fund achieves its intended objectives, as stated in the National Health Act.

1.3 Establishment of the Fund

1.3.1 The Fund

The Basic Healthcare Provision Fund (BHCPF or “The Fund”) is established by the National Health Act, No 8 of 2014.

1.3.2 Contributions into the Fund

Expected contributions into the Fund shall be as follows:

(a) an annual grant from the Federal Government of Nigeria amounting to not less than one percent (1%) of its Consolidated Revenue Fund;

(b) additional contributions from donors, international partners and others who wish to either donate or contribute into the Fund;

(c) funds from any other sources, including (but not limited to) investments and earned interest
1.3.3 Disbursement of the Fund

The Fund shall be disbursed in the following manner as provided by the National Health Act:

(a) 50 per cent of the Fund shall be used for the provision of basic minimum package of health services to citizens, in eligible primary or secondary health care facilities through the National Health Insurance Scheme (NHIS);
(b) 20 per cent of the Fund shall be used to provide essential drugs, vaccines and consumables for eligible primary healthcare facilities;
(c) 15 per cent of the Fund shall be used for the provision and maintenance of facilities, equipment and transport for eligible primary healthcare facilities;
(d) 10 per cent of the Fund shall be used for the development of human resources for primary health care;
(e) 5 per cent of the Fund shall be used for emergency medical treatment to be administered by a Committee appointed by the National Council on Health.
2 ADMINISTRATION OF THE FUND

This section of the Guidelines sets out how the Fund will be administered as well as the key functions of public-sector entities as it pertains to the Fund.

2.1 Key Stakeholders

The National Health Act 2014 confers specific responsibilities on a number of public-sector agencies to fulfil certain functions in the administration of the Fund. These Guidelines stipulate the roles and duties of these key public-sector bodies, other organisations and stakeholders in the implementation of the Fund.

National Council on Health (NCH)

(a) The National Council on Health (NCH), as established by National Health Act 2014 (Sections 4 & 5), is the highest policy making body in Nigeria on matters relating to health.

(b) It shall ratify this initial version of the Guidelines for Administration, Disbursement, Monitoring and Financial Management of the Fund and any subsequent versions, as may be reviewed from time to time.

(c) The NCH shall approve and confirm the appointments of the Chairperson and Secretary of the Ministerial Fund Oversight Committee (MFOC), which is charged with the responsibility for stewardship and administration of the Fund, to be appointed by the Minister of Health.

2.1.1 Honourable Minister of Health (HMH)

(a) The National Health Act 2014 (Section 11.7) confers on the Minister of Health, the authority to approve these Guidelines. The Minister of Health may also amend these guidelines and have such changes ratified at the subsequent NCH meeting.

(b) The Minister shall establish the Ministerial Fund Oversight Committee (MFOC) as the central coordinating body for the Administration, Disbursement, Monitoring and Financial Management of the Fund.

(c) The Minister shall set out the Terms of Reference of the MFOC, appoint its members, facilitate its role and provide general oversight.
2.1.2 Central Bank of Nigeria (CBN)

(a) The BHCPF shall be domiciled in a designated account operated and maintained at the Central Bank of Nigeria.
(b) All contributions into the Fund shall be paid into this account at the CBN.
(c) Disbursements from the Fund shall be made from the designated account as direct credits into bank accounts of recipients.
(d) The four (4) signatories (CEO/Secretary, NHIS Representative, NPHCDA Representative and FMOH Representative) to operate this account, shall be members of the Ministerial Fund Oversight Committee (MFOC)
(e) The Banking Mandate submitted to the CBN, governing the operation, disbursement and monitoring of the account, shall be developed by the MFOC and approved by the Minister of Health.

2.1.3 National Health Insurance Scheme (NHIS)

(a) The National Health Insurance Scheme (NHIS) shall provide the Basic Minimum Package of Health Services (BMPHS) to all Nigerians, in eligible primary or secondary health care facilities.
(b) The provision of the BMPHS shall be through the process of Strategic Purchasing, funded through the “NHIS Gateway” (50 percent of the BHCPF),
(c) State Health Insurance Schemes and or Third Party Administrators (TPAs) shall, on behalf of the NHIS, accredit and empanel primary and secondary health care facilities using simple, inclusive criteria\textsuperscript{12} to participate in this initiative to provide healthcare services. These criteria are contained in Appendix. The NHIS may also wish to leverage on existing state owned institutions, which have mandates for facility accreditation for this purpose.
(d) NHIS will be responsible for: (i) the recruitment, appointment, and management of the SSHIS’s or TPAs; (ii) provide technical support to the SHIS’s and TPAs; (iii) establish the regulations covering accreditation and quality of care (although these will be subject to review by the MFOC); (iv) be responsible for timely payments to the SSHIS’s and TPAs; and other functions that the Minister of Health may reasonably give them based on implementation experience;
(e) The combined Administrative Costs to NHIS, NHIS for carrying out these roles and functions has been capped at and shall not exceed half a (0.5%) percent of the BHCPF.

2.1.4 National Primary Health Care Development Agency (NPHCDA)

---

\textsuperscript{12} Criteria for accreditation of Primary and Secondary Healthcare Facilities into the initiative have been developed and are outlined in the Appendix. The criteria include minimum requirements on staffing, equipment, premises and support.
(a) The National Primary Care Development Agency (NPHCDA) and all State Primary Health Care Development Agencies (SPHCDAs) shall, through the process of Decentralised Financing for Accountability and Results (DFAAR), strengthen the operations of Primary Healthcare Centres (PHCs) across Nigeria.

(b) NPHCDA shall strengthen the operations of PHCs through the “NPHCDA Gateway,” (45 percent of the BHCPF).

(c) The NPHCDA gateway shall provide funding to eligible Primary Health Care facilities for specific areas of healthcare including: (i) provision of essential drugs, vaccines and consumables; (ii) provision and maintenance of facilities, equipment and transport; (iii) development of human resources.

(d) The National Primary Health Care Development Agency shall develop regulations and standards for PHC facilities (although these will be subject to review by the MFOC);

(e) NPHCDA will provide technical support to the SPHCDAs and review the performance of the PHC systems in the states based on various sources of data;

(f) NPHCDA will be responsible for the timely payment of the SFAs/SPHCDAs after approval is sought from the MFOC;

(g) The combined Administrative Costs, made up of payments to NPHCDA and State Primary Health Care Development Agencies (SPHCDAs) for carrying out these roles and functions has been capped at and shall not exceed two and a quarter (2.25%) percent of the BHCPF.

2.1.5 Emergency Medical Treatment Committee (EMTC)

(a) The role of the Emergency Medical Treatment Committee (EMTC) will be undertaken by the MFOC. It shall ensure the provision of basic Emergency Medical Treatment (EMT) for all Nigerians, by eligible Ambulance Services and in designated Emergency Care facilities

(b) The provision of EMT shall be through the process of Strategic Purchasing, funded through the “EMT Gateway” (5 percent of the BHCPF)

(c) The day-to-day implementation of the EMT gateway, including any commissioning that is required, shall be carried out by Federal Ministry of Health (FMOH) staff designated by the Minister of Health on the MFOC.

(d) The combined Administrative Costs, consisting of payments to MFOC for carrying out its roles and functions in overseeing the strategic framework of the EMTC, has been capped at and shall not exceed one quarter of one (0.25%) percent of the BHCPF.
Figure 2: Overview of key Stakeholders, Administration, Disbursement and Monitoring of the BHCPF

2.1.6 State Primary Health Care Development Agencies (SPHCDA)

(a) State Primary Health Care Development Agencies (SPHCDA) shall provide an additional layer of capacity and oversight for implementation of the payment process of Decentralised Financing for Accountability and Results (DFAAR), funded through the NPHCDA Gateway (45 percent of the BHCPF).

(b) All funds received on this account by the SPHCDA shall be transferred electronically to PHC facilities within a period of not more than two (2) weeks after the funds have been received.

(c) Funds transfer by the SPHCDA to providers will be carried out on a monthly or quarterly basis, to enable the PHCs address service delivery.

(d) It shall be a pre-condition for accreditation of primary healthcare facilities in all States, who wish to benefit from this operational funding for specific areas of PHC, that their State Government has established (or is in the process of establishing) a State Primary Health Care Development Agency (SPHCDA).

(e) The combined Administrative Charge of all SPHCDA and the NPHCDA for carrying out these functions and roles shall be capped at and shall not exceed two and a half (2.5%) percent of the BHCPF.
(f) The SPHCDAs shall receive at least eighty five (85) per cent (in equal sums) of the capped Administrative Charge for carrying out their functions under these Guidelines.

(g) Both the NPHCDA and SPHCDAs shall have oversight roles over accredited primary healthcare facilities.

(h) The NPHCDA and SPHCDAs shall be entitled to receive five (5) copies each of the quarterly statutory progress reports and annual statement of accounts, on the utilisation of financing provided by the Fund.

2.1.7 State Ministries of Health (SMoH) and the FCT

(a) The State Ministries of Health (SMoH) shall provide leadership at State level to ensure successful implementation of the initiative in each State.

(b) The Commissioner of Health (in each State and FCT) shall appoint a “State Fund Administrator” (SFA) who shall:

(i) Be domiciled in the SPHCDA;
(ii) Lead and ensure implementation of these Guidelines;
(iii) Monitor, track and prepare reports on disbursement of the Fund at State level.
(iv) Facilitate the independent verification process;
(v) Receive and forward to the MFOC, all Annual Reports and Returns submitted by TPAs, Providers and Independent Verifiers;
(vi) Provide a certified list of all PHCs supported by the Fund in the state to the MFOC.

(c) The SFA shall hold office for a period of four (4) years in the first instance and may be reappointed for a further term of four (4) years only on such terms and conditions as may be specified in the letter of appointment;

(d) A SFA may be removed from office by the Commissioner of Health, if the Commissioner is satisfied that it is not in the interest of the SPHCDA or the public that the SFA should continue in office.

(e) For a period of at least five (5) years starting immediately after the date of approval of these Guidelines, each State shall make annual budgetary provisions for operational expenses in Primary Healthcare Centres (PHC).

(f) Such budgetary provision shall be reflected in the annual SPHCDA budget as PHC overhead costs. As much as practicable, the appropriation shall be disaggregated in line with provisions of the National Health Act whereby 20 per cent is earmarked for essential drugs, 15 per cent for maintenance of facilities and 10 per cent for human resources development.

(g) Signatories to the Fund’s BHCPF SPHCDA Account shall be as follows:
2.1.8 Local Government Administration

(a) The Local Government Administration (LGAd) shall provide leadership at Local Government level to ensure successful implementation of the initiative in each Local Government Area (LGA).

(b) Given the push for PHC under one roof (PHCUOR), and the role of SPHCDAs as guardians of primary health care delivery, the budgetary provisions for operational expenses made by the SPHCDAs will suffice as State's conditions for accessing the grant.

2.1.9 Primary Healthcare Centres (PHCs)

(a) Primary Healthcare Centres (PHCs) shall be the first point of contact for patients who are seeking and receiving care from accredited providers under this initiative.

(b) PHCs shall provide all of the essential preventive, curative and rehabilitative healthcare services offered in the BHCPMS and serve as gatekeepers for the initiative.

(c) PHC facilities which meet the accreditation criteria set out by the NHIS/SSHIS’s/TPAs shall receive funding through both Provider Payment Mechanisms (PPMs): (i) the NHIS (50%) Gateway as “Global Payments (GP)” disbursed from the Fund through SSHIS’s/TPAs and (ii) the NPHCDA (45%) Gateway as “Decentralised Financing for Accountability and Results (DFAAR)” disbursed from the Fund through SPHCDAs.

(d) The PHCs shall have patent bank accounts with signatories including the OIC and a member of the WDC

(e) Under the NPHCDA Gateway, PHC facilities shall receive on a quarterly basis, and in advance direct electronic transfer from the SFAs.

(f) Funds received by the PHCs shall be used in strengthening health service delivery. Facilities are encouraged to use funds for improving commodity availability and community outreaches.

(g) Participating PHC facilities shall be required to produce and submit Income and Expenditure Statements for monies received from the Fund, to the SFA at the end of each financial year.
2.1.10 Secondary Health Care (SHC) Facilities

(a) Secondary Health Care (SHC) facilities shall provide specialist services to patients seeking and receiving such care from accredited specialist providers in this initiative.

(b) In this initiative, patients can only access SHC specialists through a written referral from their PHC provider.

(c) Both public and private sector SHC facilities can be involved in the initiative therefore, eligible for accreditation without any discrimination.

(d) SHC facilities, which meet the accreditation criteria set out by the NHIS/SSHIS's/TPAs shall receive funding through the relevant Provider Payment Mechanism (PPM) which is the NHIS (50%) Gateway as “Global Payments (GP)” disbursed directly from the Fund.

(e) SHC facilities shall be paid retrospectively upon confirmation of service provided.

(f) Participating SHC facilities shall be required to produce and submit Income and Expenditure Statements, for monies received from the MFOC Fund, at the end of each financial year.

2.1.11 Civil Society Organisations (CSOs)

Civil Society Organisations (CSOs) with a proven history of involvement in health sector monitoring and development shall provide independent oversight for the Fund. Such functions shall be carried out through:

(a) The monitoring of disbursements by the MFOC and ensuring robust financial management.

(b) Annual independent audits and assessment reports.

2.1.12 Impact Evaluation Studies

The conduct and analysis of an Impact Evaluation (IE) process, subject to approval by the Minister of Health shall be undertaken by a reputable firm with technical expertise to provide such.

2.1.13 Ministerial Fund Oversight Committee (MFOC)

(a) To ensure adequate stewardship, regulation, governance and oversight of the Fund, the Minister of Health shall constitute a Ministerial Fund Oversight Committee (MFOC).

(b) The MFOC shall have ultimate responsibility to ensure compliance of all agencies and bodies with these Guidelines.
(c) The Minister of Health shall appoint the Chairperson and Secretary of the Ministerial Fund Oversight Committee (MFOC). The National Council on Health (NCH) shall confirm such appointments and tenure or duration.

(d) Based on recommendations from the management of the NHIS and the NPHCDA, the Minister shall appoint two (2) representatives each of the NHIS and NPHCDA respectively, as members of the MFOC, to perform assigned roles for the NHIS and the NPHCDA on the MFOC. The Minister shall also appoint two (2) representatives of the FMoH to perform assigned roles for the FMoH

2.1.13.1 Composition of the Ministerial Fund Oversight Committee (MFOC)

The MFOC shall be composed of the following persons:

(a) The Chairperson of the Committee who shall be part-time and of proven integrity, and who shall function as the representative of the Minister of Health;

(b) The Secretary who shall be a person from either the Private or Public healthcare sector with not less than ten years’ experience of healthcare financing, shall be the full-time Chief Executive, Accounting Officer, manage the MFOC and work to implement these Guidelines, such person shall be appointed by the Minister of Health;

(c) Two representatives of the National Health Insurance Scheme (NHIS), one of which shall be the signatory on the MFOC for all matters pertaining to the role of the NHIS and the Fund;

(d) Two representatives of the National Primary Health Care Development Agency (NPHCDA), one of which shall be the signatory on the MFOC for all matters pertaining to the role of the NPHCDA and the Fund;

(e) Two representatives of the Federal Ministry of Health (FMoH), one of which shall be the signatory on the MFOC for all matters pertaining to the role of the FMoH and the Fund;

(f) A Representative of Civil Society Organisations (CSOs) who shall act as an independent member of the MFOC with particular responsibility for governance, accountability and prudence;

(g) A representative of Development Partners who shall act as an independent member of the MFOC with particular responsibility for governance, accountability and prudence;

(h) A representative of private sector health care providers who shall act as an independent member of the MFOC with particular responsibility for ensuring timely payment to providers and keeping the reporting burden reasonable; and

(i) Two representatives from the states
(j) Signatories to the Fund’s CBN Accounts shall be as follows:

<table>

2.1.13.2 Tenure

(a) Each member of the MFOC, with the exception of the Secretary, shall hold office for a term of four (4) years and no more; on such terms and conditions as may be specified in the letter of appointment;
(b) Each member of the MFOC, with the exception of the Secretary may vacate office if a duly signed letter of resignation is sent to the Chairperson.
(c) The Secretary shall hold office for a period of four (4) years in the first instance and may be reappointed for a further term of four (4) years only; on such terms and conditions as may be specified in the letter of appointment.
(d) A member of the MFOC may be removed from office by the Minister, subject to approval and ratification by the NCH, if the Minister is satisfied that it is not in the interest of the MFOC or the public that the member should continue in office.

2.1.13.3 Functions of Ministerial Fund Oversight Committee.

(1) The Ministerial Fund Oversight Committee shall be responsible for the oversight of the Fund and undertake the following functions:

(a) Procure, appoint and manage the Independent Verification Agents (IVAs);

(b) Procure, appoint and manage the external auditors;

(c) Approve, together with the relevant agencies, payments to the recipients (SFAs, SPHCDAs, SSHIS's, TPAs) of the different gateways;

(d) Review regulations and requirements established by NPHCDA and the NHIS;

(e) Review, standardise and approve the service level agreements (i) between SPHCDAs/SFAs and the relevant public facilities under the NPHCDA gateway; and (ii) between SSHIS/TPAs and private or public providers under the NHIS gateway.
(f) Serve as the Secretariat for Fund activities

(g) Ensure that monies are disbursed, managed, and accounted for in a transparent and accountable manner, and in accordance with these Guidelines;

(h) Monitor the implementation of the Fund;

(i) Establish and manage a system of complaints and redress for patients, communities, and providers.

(2) In order to facilitate successful implementation, the Secretary of the MFIC and other members of the team will receive a Performance Bonus linked inter alia to timely and efficient disbursement of financing from the Fund

2.1.13.4  Domicile of Ministerial Fund Oversight Committee

(a) The Ministerial Fund Oversight Committee (MFOC) may be based and operate from offices in the Federal Ministry of Health and report directly to the Minister of Health.

(b) Nothing should preclude the MFOC, provided finances and circumstances allow, from establishing its own offices outside the Federal Ministry of Health.

2.1.13.5  Liaison and Relationship between MFOC, NHIS and NPHCDA

(a) The MFOC shall work in conjunction with the NHIS and the NPHCDA to realise stated outcomes pertaining to the Fund.

(b) As provided for under these Guidelines, the MFOC shall ensure that obligations imposed on the NHIS and the NPHCDA are achieved in a manner, which is compatible with those set out in these Guidelines.

(c) The representative of the NHIS and the representative of the NPHCDA on the MFOC shall approve and “sign-off” on all aspects of disbursement of the Fund, related to their respective organisations, in accordance with stipulations of the National Health Act 2014.

(d) Decisions and determinations of the MFOC on the Fund shall be binding on, and deemed as those taken by, the FMoH, NHIS and the NPHCDA.
2.1.13.6 Liaison and Relationship between MFOC, SPHCDAs and SFAs

(a) The MFOC shall work closely in conjunction with SPHCDAs, through the State Fund Administrator (SFA) in each State, to realise the stated objectives of the Fund.

(b) As provided for under these Guidelines, the MFOC has oversight and a supervisory role over the SPHCDAs, through the SFA, to ensure compliance with these Guidelines, which is required in order to guarantee continuous flow of direct transfers to healthcare facilities.

2.1.13.7 Compliance and Sanction powers available to the MFOC

The MFOC acting with the consent and on behalf of the Minister of Health, FMoH, NHIS and NPHCDA, from which it derives its authority and legitimacy, shall ensure full implementation and compliance with the Guidelines including through:

(a) Issuing written advisory and reminders to non-complying States, Local Governments and/or healthcare facilities;

(b) Deferring payments to non-complying States, Local Governments and/or healthcare facilities until such requirements or advisory in Guidelines and other necessities are met; and

(c) Suspending payments to non-complying States, Local Governments and/or healthcare facilities.

2.1.14 Memorandum of Understanding (MoU)

(a) Each participating State Government (and the FCT), through its SPHCDA shall sign a Memorandum of Understanding (MoU) with the MFOC to govern its participation in the initiative.

(b) This MoU shall set out details of involvement, expected benefits as well as obligations of the State, including estimated amounts allocated for disbursement, reporting obligations, service-level agreements (SLAs) and reporting requirements, especially of health metrics and indicators.

(c) The MoU shall include an agreement that funds may be routed through SPHCDAs but such funds are for immediate disbursement to accredited and eligible health facilities.
2.1.15 Emergency Medical Treatment Committee (EMTC)

(e) To ensure adequate disbursement, administration and monitoring of the EMT Gateway and the five percent (5%) section of the Fund, the functions of the Emergency Medical Treatment Committee (EMTC) shall be subsumed under the MFOC.

(f) The MFOC will carry out the functions of the Emergency Medical Treatment Committee (EMTC) and shall supervise the administration and disbursement of the five (5%) per cent proportion of the Fund, set aside for Emergency Medical Treatment.

2.1.16 Counterpart Funding

(a) Under the National Health Act 2014, States (and the FCT) and Local Governments shall provide counterpart funding of twenty five percent (25%) of the sum being disbursed from the Fund to obtain financing from the Fund.

(b) Use of counterpart funding as a mechanism to engender State participation, inclusion and ownership of federally led programs have in the past not yielded the desired results. The Universal Basic Education Fund readily comes to mind. The fund, which now has in excess of N58bn, continues to lie fallow with States unable to access it due to fiscal constraints. The Federal Government has recently called for a loosening of the conditions set in the UBEC act to increase States access to the fund.

(c) Recognising these challenges, innovative solutions that ease the conditions for disbursement and enable flow of funds to frontline service delivery points are required. In this regard, the conditions for accessing the funds arising from the NPHCDA gateway are as follows:

i. Each State shall for a period of at least five (5) years starting immediately after the date of approval of these Guidelines, make annual budgetary provisions for operational expenses in Primary Healthcare Centres (PHC).

ii. This budgetary provision shall be reflected in the annual SPHCDA budget as PHC overhead costs. As much as practicable, the appropriation should be disaggregated in line with provisions of the National Health Act whereby 20 per cent is earmarked for essential drugs, 15 per cent for maintenance of facilities and 10 per cent for human resources development.

iii. Each SPHCDA shall receive 40% of the total possible sum per State in the first instance upon confirmation by the MFIC that budget lines have been created for PHC operational expenses in the annually published budgets.
iv. A second tranche of disbursement of not more than 15% of the funds shall be made in the following quarter as soon as the evidence of timely payment from the SPHCDAs to the PHCs has been verified.

v. A third tranche of disbursement of not more than 15% of the funds shall be made in the following quarter as soon as the evidence of timely payment from the SPHCDAs to the PHCs has been verified.

vi. A final tranche of disbursement of 30% of the funds shall be made to the SPHCDAs upon release of their annual financial statements and audited accounts.

vii. States who are unable to produce their annual financial statements and audited accounts four (4) months into a new fiscal year will be deemed to have forgone the final tranche of payments.

(d) The MFOC shall monitor the actual release of the funds provided in the Appropriated Budgets of State Governments, FCT or Local Governments.

(e) State Governments and the FCT, at the beginning of each year or as soon as is practically possible, may send five (5) copies of their budget to the MFOC with a request for release of any due payments from the Fund.

(f) Sunset Clause: After the initial period of five years, a fresh set of Guidelines shall be drawn up outlining the terms for the provision of counterpart funding by States, FCT and Local Governments

2.1.17 Annual Reports Financial Accounts and Filings

(a) Each participating State through its SPHCDA and SSHIS shall be required to submit to the MFOC, at the latest by 30th of April of the following year, annual Audited Accounts (including Bank Statements and Payment Vouchers) on all disbursements received by the State from The Fund, in the preceding financial year (January to December).

(b) The MFOC shall receive, collate and publish all these Audited Accounts with an overview of the current status of The Fund, in an Annual Report on or before 30th June of the following year.

2.1.18 Administrative Expenses

(a) The bulk of financing from the Fund shall be directed at meeting the costs of patient care.

(b) The MFOC shall thus utilise and leverage on existing organisational structures and mechanisms at the Federal, State and Local Government levels for administration, disbursement and monitoring.

(c) All administration expenses, including disbursement, monitoring and data collection costs to be incurred by the MFOC, SPHCDA and LGAD shall be paid
for through the delineation of an annual allowance. This annual allowance shall not exceed an annual maximum limit of five percent (5%) of the funds accruing to The Fund. This sum shall be set aside for this purpose. The amount set as administrative expenses may increase subject to approval by the Minister.

2.1.19 Roll-Over of Excess Funds

(a) At the end of each financial year, where an annual surplus arises in the Fund as a result of underutilisation, poor uptake or any other development and having settled all outstanding claims and cash-calls, any such surplus funds shall be rolled-over to be paid back into the next years’ Fund.

(b) Liquidation of any financial assets of the Fund such as the Treasury Bills, for any purpose, shall require approval by the MFOC (simple majority voting) and authorisation by the Minister of Health.

(c) States who do not meet the requirements for funds disbursement in any given year have no recourse to retrieving the funds retrospectively.

(d) At the beginning of each year, the total sum available shall be the sum of any rolled-over funds and the new accruals from the different revenue sources.

Figure 5: Governance Structure for Administration of the Fund
3 DISBURSEMENT AND ALLOCATION OF THE FUND

3.1 Background

The disbursement of monies from the Fund is designed to be simple and transparent. To this end, an allocation formula where all thirty-six (36) States and the FCT receive an equal share of the Fund (irrespective of land mass, population, and disease burden) has been adopted. Through this funding mechanism, it is expected that the majority of states (and the FCT) would be in a position to access the funds on a regular basis. In recognition of this principle:

(a) The current challenging economic climate where most State Governments are facing economic uncertainty with a serious liquidity crisis, has been recognised. So as not to exacerbate the cash-flow situation of the State Governments, for a period of at least five (5) years starting immediately after the date of approval of these Guidelines, each State shall make annual budgetary provisions for operational expenses in Primary Healthcare Centres (PHC) to satisfy the requirement for counterpart funding outlined in Section 11 (5) of the National Health Act 2014.

(b) Payments shall be disbursed from the BHCPF accounts to a dedicated SPHCDA account for immediate and onward transfer to facilities. Such dedicated account shall be setup to receive credits before disbursements commence.

(c) The disbursement cycle shall be on a monthly/quarterly basis subject to the beneficiaries providing adequate monitoring and quality information to the MFOC.

(d) The Fund shall be utilised primarily for three purposes:
   (i) to pay for the provision of the Basic Minimum Package of Health Services (BMPHS) as defined in these Guidelines; and
   (ii) to fund the operational expenses of Primary Healthcare Centres (PHCs) across Nigeria
   (iii) to provide basic Emergency Medical Treatment, initially focused on Road Traffic Injuries (RTIs) arising from “accident hotspots” across Nigeria

The details and content of the Basic Minimum Package of Health Services (BMPHS), as defined, are discussed below.
3.2 Fund Access

(a) Access to the Fund for payments for care delivered would be open to all (public-sector and private-sector) providers, in all States (and FCT) of the Federation.

(b) To improve access and quality of care in rural areas, during the first five (5) years of operation of the NHIS Gateway, sole preference shall be given to healthcare providers situated in Rural Areas. Throughout this initial period, zero funding would be available for healthcare providers in urban areas. For the providers in rural areas, maximum assistance for accreditation would be provided so that at least “one healthcare facility per ward” is able to participate in this initiative.

Funding Gateways

(a) The process pathways through which disbursement and claims shall be funded have been designed in line with the provisions of National Health Act 2014. The “NHIS Gateway”, is the pathway by which 50% of the BHCPF will be disbursed. The Provider Payment Mechanism for this process is termed “Global Payments.” The second pathway through which 45% of the Fund will be disbursed is known as the “NPHCDA Gateway” which will utilise the Provider Payment Mechanism known as “Decentralised Financing for Accountability and Results (DFAAR)”. The third is the “EMT Gateway”, which is the pathway by which 5% of the BHCPF will be disbursed for Emergency Medical Treatment. The Provider Payment Mechanism for this process is also termed “Global Payments.”

(b) In the Global Payments Mechanism, funds are disbursed using the traditional “fee-for-service” principle; the provider makes a claim for payment after the treatment has already been provided.

(c) In the DFAAR Payment Mechanism, funds are disbursed subject to the fulfilment of conditions listed in section 2.1.16 (counter part funding) above

(d) In both instances, the financing mechanisms are output-based, and in line with international best practices.

(e) Payments shall be made on a monthly or quarterly basis, subject to the SFA and MFOC receiving meaningful monitoring and quality assurance data.

---

13 Definition of a Rural Area in Nigeria will be based on population size of the conurbation
3.3 Verification of Fund Utilisation

a) Independent verification of utilisation of services shall be conducted through Independent Verification Agents (IVAs) using random samples and customer surveys, both from a central call centre and also through home visits.

b) The IVAs will be recruited, appointed, and managed by the MFOC.

c) Periodic random samples shall be interviewed to verify that care given was appropriate, up to the expected standards and was associated with quality outcomes.

3.4 Accreditation

One of the objectives of the BHCPF is to improve access and utilisation of basic maternal health services with a special emphasis on the poor who are more represented in rural areas. The use of Skilled Birth Attendants (SBA) is far lower in rural (23%) compared with urban (67%) areas and among the poorest income quintile (5.7%) compared with the highest income quintile (85.3%)\textsuperscript{14}. Given the need to reach the rural and poor communities, these Guidelines sets out accreditation standards which are deemed appropriate for the intended (rural) healthcare

providers; which may be less stringent initially, but will increase over time. This is a deliberate pro-poor benefit of the BPHCPF.

(a) Any rural provider that wishes to participate in the initiative shall be accredited by relevant TPAs or SSHIS as an entry requirement.

(b) The accreditation process (see Appendix for sample Process Form) will be simple. It shall consist of data capture electronic (where possible) and be based on clinical functionality rather than just physical assets.

(c) The fifteen (15) basic requirements for Accreditation of **Rural Primary Healthcare Centres** are as follows:

<table>
<thead>
<tr>
<th>REQUIREMENT</th>
<th>SATISFIED (YES/NO)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Skilled Health Worker (doctor, nurse, midwife, or CHEW)</td>

</tbody>
</table>

**Table 1:** Basic Accreditation Requirements for Rural PHCs

### 3.5 Provision of Healthcare Benefits

The details of interventions to be included in the Basic Minimum Package of Health Services (BMPHS), developed for this initiative are outlined below (Table 2)

(a) The Basic Minimum Package of Health Services (BMPHS) for Nigeria (2016) shall consist of nine (9) interventions; Urinalysis screening test and a Cardiovascular Disease (blood pressure, BP check) for all Nigerians, four (4) for Maternal Health interventions for pregnant women, care for children under five (malaria and vaccine preventable diseases) as well as basic Emergency Medical Treatment for Road Traffic Injuries (RTIs). Every Nigerian...
will be entitled to accessing this level of care without charge at the point of care, which guarantees most interventions required for safe antenatal care and delivery, as well as regular blood pressure screening.

(b) A phased approach shall be implemented for the introduction of these interventions in the BMPHS to the population.

(c) Except for Emergency Medical Treatment, in the first instance, during the first five years of operation of this initiative, the BMPHS will be available to only those who live in RURAL areas, with subsequent extension to other areas after the initial five year period.

3.6 Provider Payment Mechanisms (PPMs)

(a) The Provider Payment Mechanisms (PPMs) adopted for this initiative are based on current, international best–practice. The mechanisms reflect the paradigm shift from “input–based” to “output–based” (results) financing.

(b) The “Global Payments” Provider Payment Mechanism for the NHIS Gateway and the “EMT Gateway” is a modified form of the well–established “Fee–for–Service” payment process. Providers shall be expected to render services and then submit claims for payment retrospectively (on a monthly or quarterly basis).

(c) The “Decentralised Financing for Accountability and Results” Provider Payment Mechanism for the NPHCDA Gateway is a modified form of the more recently established Decentralized Facility Financing” (DFF) or “Results–Based Financing” (RBF) process. Providers are funded prospectively, on a quarterly basis, for operational expenses with both “front–loaded” and “completion–linked” incentive payments.

(d) For the procurement of clinical services, in particular, for the provision of Emergency Medical Treatment, the practice of Strategic Purchasing\textsuperscript{15} would be adopted.

Table 2: Contents and Interventions in the Some Basic Minimum Package of Health Services (BMPHS) for Nigeria 2016 (excluding Emergency Medical Treatment)

3.7 Payment Tariffs

(a) A minimum of 95 per cent of the monies accruing to the Fund shall be utilised in the purchase of care. A credible, costed BMPHS for this initiative has been developed through a very rigorous procedure. The tariffs to be paid to providers in the private and public sectors will be determined by professional actuaries recruited by NHIS. The tariffs will be approved by the MFOC.

(b) There are two different payment plans available under the initiative. The NHIS Gateway and EMT Gateways utilise a retrospective, reimbursement system, requiring an explicit fee schedule whereas the NPHCDA is a prospective, stimulatory system, characterised by periodic disbursement of conditional, bulk grants.

(c) The NHIS Gateway and EMT Gateways shall fund the BMPHS where providers are able to submit claims for reimbursement for the costs of care given to patients. The Payment Tariff on which decisions on amounts to pay in claims for care to eligible primary and secondary care providers, is outlined below:
**Table 3: Unit Intervention Costs for the BMPHS (NHIS Gateway)**

<table>
<thead>
<tr>
<th>Intervention</th>
<th>Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Antenatal Care (ANC)</td>
<td></td>
</tr>
<tr>
<td>2. Labour &amp; Delivery Care</td>
<td></td>
</tr>
<tr>
<td>3. Emergency Obstetric and Neonatal Care (EmONC)</td>
<td></td>
</tr>
<tr>
<td>4. Children under five (malaria and vaccine preventable diseases)</td>
<td></td>
</tr>
<tr>
<td>5. Caesarean Section</td>
<td></td>
</tr>
<tr>
<td>6. Blood Pressure/Hypertension</td>
<td></td>
</tr>
<tr>
<td>7. Diabetes screening (Urinalysis tests)</td>
<td></td>
</tr>
</tbody>
</table>

(d) The NPHCDA Gateway shall fund Operational Expenses in Primary Healthcare Centres through disbursement of defined, quarterly, bulk conditional grants. This payment structure does not require an explicit or implied Payment Tariff.

### 3.8 NHIS Gateway

#### 3.8.1 Benefit Package

The NHIS Gateway shall provide funding to ensure all Nigerians are able to receive the Basic Minimum Package of Health Services (BMPHS) for Nigeria (2016), completely free at the point of delivery, without any user fees whatsoever. The BMPHS shall consist of nine (9) interventions:

i. **Antenatal Care (ANC):** Minimum of 4 ANC visits, Malaria prevention with Intermittent Preventive Treatment (IPT): Sulphadoxine and Pyrimethamine; PMTCT (HIV/AIDS), ITN, Folic Acid, Iron, Urinalysis, Haemoglobin screening.

ii. **Labour & Delivery Care:** Skilled Birth Attendants (SBAs) at all facilities, Partograph Monitoring, Episiotomy & Repair, Post-Natal care including mother and baby care, from first visit within 48 hours of delivery to second visit 6 weeks post-partum.

iii. **Emergency Obstetric and Neonatal Care (EmONC):** Basic & Comprehensive Emergency Obstetric and Neonatal Care, IV/IM Antibiotics, IV/IM Oxytoxics, IV/IM Anticonvulsants, Manual removal of placenta, Assisted vaginal delivery, Removal of conception retained
iv. **Clinically–indicated Elective Caesarean Section:** Instrument delivery (forceps delivery, vacuum extraction), Chorio–amnionitis, Gestational Diabetes, Hypertension, Multiple pregnancy, Placenta Praevia, Pre–eclampsia and Eclampsia, IUGR.

v. **Coverage of illnesses in children under 5:** Malaria, Diarrhoea, Pneumonia, vaccine preventable diseases.

vi. **Hypertension:** Primary Care Blood Pressure Monitoring; Secondary Prevention Education, Lifestyle interventions for preventing Hypertension, Advice and facilitated referral on Blood pressure control in people with pressure higher than 140/90 mmHg.

vii. **Diabetes:** Urinary screening and advice and facilitated referral on diabetes prevention and control

viii. **Routine Immunisation:**

ix. **Emergency medical treatment** for road traffic injuries

### 3.8.2 Operation of the NHIS Gateway

(a) In the first five years (5) years of its operation, the NHIS Gateway shall be implemented as a pro–poor programme, with a view to redressing the inequity in access to care experienced by poor, rural dwellers.

(b) To improve access and quality of care in rural areas, during the first five (5) years of operation of the Fund, sole preference will be given to healthcare providers situated in Rural Areas.

(c) During this initial period, there shall be no funding available from the Fund for healthcare providers in urban areas.

(d) Healthcare providers in rural areas shall be offered maximum assistance for accreditation so that at least “one healthcare facility per ward” is able to participate in this initiative.

(g) **Sunset Clause:** After this initial period of five years, a fresh set of Guidelines shall be drawn up outlining the terms for the operation of the NHIS Gateway especially on the eligibility of other providers (urban and rural) to be accredited into and join the initiative.

### 3.8.3 Healthcare Provider Rights and Responsibilities

(a) Both public and private sector (rural) healthcare providers shall be eligible to apply for accreditation and participate in the initiative.

(b) To be eligible and receive payment in this initiative, each healthcare provider has to be accredited by the Third Party Agent/SSHIS, acting on behalf of the NHIS.
(c) Each facility shall meet the minimum criteria of quality standards before it can be accredited. A quantitative quality supervisory checklist (developed by the NHIS) will be administered to all enrolled facilities to monitor and ensure a consistent level of quality.

(d) Healthcare providers shall not refuse treatment to any patient under the initiative or charge user fees, either as a “Top-Up” or as “Co-Payment”

(e) The provider will be obliged to display a large sign in front of its building publicizing: (i) the fact that it provides free care for all mothers and will not charge on top of the fee provided through this gateway; (ii) will provide free blood pressure and diabetes screening; and (iii) providing the telephone number and web address of the redress mechanism established by the MFOC.

(f) Pre-selected public and private sector providers shall be paid a bundled fee to provide a defined package of services at no cost to the target population.

(g) Healthcare providers shall maintain high standards of medical record keeping and submit both clinical and administrative data to the SPHCDA/SFA (for onward transmission to the MFOC) as and when due. The providers will allow auditors and IVAs designated by the MFOC access to their records;

(h) Healthcare providers shall develop and maintain a robust referral system for the management of emergency or complicated patients, so there is direct access between primary care provider and neighbouring secondary health facilities with the capacity to manage any such cases.

(i) Any patient determined to require emergency care, must be promptly referred and arrive at the secondary centre within one (1) hour (60 minutes) of the decision being made.

(j) Selection and continued participation in the initiative is contingent on the healthcare provider continually improving its quality of care.

(k) Healthcare providers must remain in good professional standing with their registration bodies, including meeting Continuous Professional Development (CPD) requirements.

(l) Health care providers should expect payment of their invoices within 90 days of their submission to the SSHIS’s/TPA or equivalent;

(m) Healthcare providers have the right to complain and seek redress for issues or problems that arise from the operation of this gateway. The redress mechanism will be operated at the behest of the MFOC.

3.8.4 Third Party Agents/Administrators (TPAs)

(a) Day-to-day operational aspects of the NHIS Gateway shall be carried out by Third Party Agents (TPAs)/SSHIS who shall either be for-profit or not-for-profit organisations; contracted to carry out defined functions and roles on behalf of the MFOC, NHIS and SPHCDA, by the SFA.
(b) All TPAs/SSHIS shall have the requisite experience in the following areas: (i) Provider Accreditation (b) Claims Management (c) Data Analysis

(c) The functions and roles assigned to contracted TPAs or SSHIS would include: (i) Accreditation of Healthcare Providers (ii) Provider Management, including Case Management (iii) Fund Management (iv) Call–Centre Operations (v) Service Level Agreements governing such processes (vi) Liaison between MFOC, NHIS, SPHCDA and SFA (Regulator Relations) (vii) any other function outsourced to the TPA.

(d) The SFA/SSHIS acting for and on behalf of the NHIS and SPHCDA may procure, appoint and manage TPAs who shall be engaged provisionally for three (3) years in the first instance.

(e) At the expiration of the initial three (3) year contract, the contract may be renewed provided there is a favourable assessment of performance of the TPA on designated functions and review of the number of complaints made against the TPA.

3.8.5 Payment Model

(a) Accredited healthcare providers who have rendered services shall be paid through the Global Payments Mechanism, which is a modified “Fee–for–Service process.

(b) Quarterly payments will be made through SSHIS’s or TPAs to healthcare providers on behalf of the NHIS, based on the number of patients seen and treated.

(c) The provider payment model is retrospective, claim–based process outlined in Figure 7

(d) At the end of each quarter, providers present an invoice(s) to the SSHIS’s/TPAs who verify the claim. Provided this is valid, the SSHIS/TPA passes the invoice(s) and supporting documents to the SFA, then the MFOC where the Secretary and the NHIS Representative sign off on the claim. This triggers off a request to the CBN to make the payment directly into the account of the healthcare provider, for services rendered.
3.9 NPHCDA Gateway

The NPHCDA Gateway shall provide funding to strengthen the delivery of Primary Care across the country by underwriting the Operational Expenses of Primary Healthcare Centres (PHCs). Operational Expenses, including funds required for improvement of facility, basic repairs, procurement of basic supplies, vaccine retrieval from the cold chain store, community outreaches and health promotion activities have traditionally been underfunded, which has undermined the effectiveness and functionality of PHCs.

3.9.1 Operation of the NPHCDA Gateway

(a) All States through their SPHCDAS shall be entitled to receive equal allocation of resources in any given year.

(b) The “Decentralised Financing for Accountability and Results” Provider Payment Mechanism for the NPHCDA Gateway is a modified form of the more recently established Decentralized Facility Financing” (DFF) financing or “Results–Based Financing” (RBF) process. Providers are funded prospectively,
on a quarterly basis, for operational expenses with both “front-loaded” and “completion-linked” incentive payments

(c) Sunset Clause: After this initial period of five years, a fresh set of Guidelines shall be drawn up outlining the terms for the operation of the NPHCDA Gateway especially on the eligibility of other providers (urban and rural) to be join the initiative.

3.9.2 Healthcare Provider Rights and Responsibilities

(a) Primary Health care facilities selected based initially on the One Functional PHC per Ward strategy shall be eligible to apply for accreditation and participate in the initiative.
(b) To be eligible and receive payment in this initiative, each healthcare provider shall be empanelled by the SFA/SPHCDA.
(c) In order to ensure a consistent level of quality, each facility shall meet the minimum criteria of quality standards before it is eligible to be empanelled.
(d) The SFA/SPHCDA shall ensure there is at least one (1) participating PHC facility in every Ward.
(e) The SFA/SPHCDA shall ensure every participating PHC facility opens and operates a bank account.
(f) The SFA/SPHCDA shall ensure that the signatories to the account shall be the Officer-In-Charge of the PHC (Primary Provider) and the Ward Development Committee (WDC) Chairperson.
(g) The SFA/SPHCDA shall encourage active community participation in the PHC facility operations.
(h) The PHC and community, through the Ward Development Committee, shall have considerable autonomy over the utilisation of payments from the Fund; to be used as required for the improvement of facility-based services and for outreach.
(i) The PHCs will be expected to use the funds for demand generating activities, community outreaches, health promotion and prevention activities, basic repairs, procurement of basic commodities and vaccine retrieval from the cold chain store.
(j) The PHC will not provide any payment to any State or LGA official.
(k) Where there is low demand for care, PHCs shall be required to focus on community outreach.
(l) Healthcare providers shall maintain high standards of medical record keeping and submit both clinical and administrative data to the SPHCDA/SFA (for onward transmission to the MFOC) as and when due.
(m) Selection and continued participation in the initiative is contingent on the healthcare provider maintaining adequate quality standards of care.
(n) Healthcare providers must remain in good professional standing with their registration bodies, including meeting Continuous Professional Development (CPD) requirements.

(o) PHCs will be obliged to put up a large sign outside the premises indicating that the facility provides free maternal care, free hypertension and diabetes screening, and free immunization.

3.9.3 Payment Model

The provider payment model is prospective, bulk grant process outlined in Figure 8. The SFA/SPHCDA shall immediately transfer into the bank accounts of each eligible, empanelled PHC facility, equal sums as a prospective, bulk grants, for operational expenses, as soon as funds are released from the BHCPF CBN TSA sub-account. The regular funding cycle would be QUARTERLY with the following incentivised schedule:

- **Quarter One:** 40% of allocated funds—released on meeting criteria
- **Quarter Two:** 15% of allocated funds—released as routine
- **Quarter Three:** 15% of allocated funds released as routine
- **Quarter Four:** 30% of allocated funds released on receipt of returns

The Quarter Four disbursement (30% of allocated funds) shall be contingent on receipt by SFA/SPHCDA the validated proof of utilisation status of initial grants to PHCs. Each SFA/SPHCDA shall be entitled to an annual bonus if it achieves all the stated targets also publishes its audited accounts by September of the following year. As earlier stated, States that do not meet the requirements for disbursement in any given year shall be deemed to have forfeited the allocation. At the start of each fiscal year, the opening balance for the NPHCDA gateway shall be the rolled-over sums in addition to annual accruals.
3.10 EMT Gateway

3.10.1 Emergency Medical Treatment Package

The EMT Gateway shall provide funding to ensure all Nigerians are able to receive the Emergency Medical Treatment (EMT) component of the Basic Minimum Package of Health Services (BMPHS) for Nigeria (2016), completely free at the point of delivery, without any user fees whatsoever.

The EMT component of the BMPHS shall consist of three (3) modules:

i. **Scene (Emergency Pre-Hospital Care):** Tier One First Responder, Tier Two Basic Prehospital Trauma Care, Tier Three Advanced Prehospital Trauma Care, Care Documentation

ii. **Transfer (Transportation & Communication):** Field Triage, Ground Transportation, Air Medical Transport, “Universal” Telephone Number

iii. **Facility (Initial Evaluation, Diagnosis & Resuscitation and In-Hospital Care):** Reception-Registration, Screening, Triage, Handover; Emergency Unit Care–Initial Assessment & Resuscitation, Monitoring and Revaluation, Detailed
3.10.2 Operation of the EMT Gateway

(e) In the first three (3) years of its operation, the EMT Gateway shall be implemented as an INTERVENTION programme, with a view to addressing the excess mortality surrounding fatal Road Traffic Injuries (RTIs) in Nigeria.

(f) To significantly reduce mortality during the first three (3) years of operation of the Fund, six (6) most dangerous routes in Nigeria, designated “Accident Hotspots” (Table 4) will be targeted with deployment of maximum resources.

(g) During this initial period, there a UNIVERSAL EMERGENCY NUMBER that would be valid throughout the catchment areas, available from every telephone device (landline or mobile), easy to remember and dial (i.e., limited to 3 or 4 digits) and would be free of charge would be established and launched.

(h) Emergency Care Providers in close proximity (30 km radius) to each of these “Accident Hotspots” will be encouraged to significantly upgrade and improve their capacity and capability and offered maximum assistance for accreditation to participate in this initiative.

(h) Sunset Clause: After this initial period of five years, a fresh set of Guidelines shall be drawn up outlining the terms for the operation of the EMT Gateway especially on the eligibility of other providers (urban and rural) to be accredited into and join the initiative.

16 The selection criteria for these Accident Hotspots: Routes with >50 RTI Fatalities in 2015 (data from FRSC Annual Report 2015)
3.10.3 Healthcare Provider Rights and Responsibilities

(n) Ambulance Service Providers shall provide, as a standard of care, “Scene Incident Managers (SIMs)” who shall secure the scene, coordinate the Emergency Response, all communications and transport at and from the RTI scene.

(o) Both private-sector and public-sector healthcare providers shall be eligible to apply for accreditation and participate in the initiative.

(p) To be eligible and receive payment in this initiative, each healthcare provider has to be accredited by the MFOC.

(q) Each facility shall meet the minimum criteria of quality standards before it can be accredited. A quantitative quality supervisory checklist will be administered to all enrolled facilities to monitor and ensure a consistent level of quality.

(r) Healthcare Providers shall not refuse treatment to any patient under the initiative or charge user fees, either as a “Top-Up” or as “Co-Payment”.

(s) Emergency Care Providers shall maintain high standards of medical record keeping and submit both clinical and administrative data (for onward transmission to the MFOC) as and when due.

(t) Ambulance Service Providers shall develop and maintain a robust communications and referral system for the management of emergency patients, so there is direct access between Ambulance Service Provider and neighbouring Emergency Care facilities with the capacity to manage any such cases.

(u) Any patient determined to require emergency care, must be promptly transported and arrive at the Emergency Care centre within half an hour (30 minutes) of the decision being made.

(v) Selection and continued participation in the initiative is contingent on the healthcare provider maintaining adequate quality standards of care.

(w) Healthcare Providers must remain in good professional standing with their registration bodies, including meeting Continuous Professional Development (CPD) requirements.

3.10.4 Commissioning of Services

(f) Day-to-day operational aspects of the EMT Gateway shall be carried out by Healthcare Providers and Facilities who shall either be for-profit or not-for-profit organisations; contracted to carry out defined functions and roles on behalf of the MFOC, EMTC and FMoH.

(g) The MFOC, acting on behalf of the EMTC shall commission (Strategic Purchasing) accredited Ambulance Service Providers nationwide, including the Federal Road Safety Corps (FRSC), State Ambulance Services, National...
Emergency Management Agency (NEMA), Private Sector Ambulance Service Providers and Voluntary Sector Ambulance Service Providers.

(h) The MFOC, acting on behalf of the EMTC shall commission nationwide (Strategic Purchasing) accredited Healthcare Facility Providers with capacity and personnel for Emergency Initial Evaluation, Diagnosis & Resuscitation and any required basic In–Hospital Care including the Federal Tertiary Centres, State Tertiary Centres, Private Sector Tertiary and Emergency Care Providers and Voluntary Sector Tertiary and Emergency Care Providers

(i) The MFOC, acting on behalf of the EMTC shall commission nationwide (Strategic Purchasing) Healthcare Providers who shall be engaged provisionally for three (3) years in the first instance.

(j) At the expiration of the initial three (3) year contract, the contract may be renewed provided there is a favourable assessment of performance of the Healthcare Provider on designated functions and review of the number of complaints made against the Provider

3.10.5 Payment Model

(e) Accredited healthcare providers who have rendered services shall be paid through the Global Payments Mechanism which is a modified “Fee–for–Service process.

(f) Quarterly payments will be made through SSHIS or TPAs to healthcare providers on behalf of the MFOC, based on the number of patients seen and treated.

(g) The provider payment model is retrospective, claim–based process

(h) At the end of each quarter, providers present an invoice(s) to the SSHIS/TPAs who verify the claim. Provided this is valid, the SSHIS/TPA passes the invoice(s) and supporting documents to the MFOC where the Secretary and the EMTC Representative sign off on the claim. This triggers off a request the CBN to make the payment directly into the account of the healthcare provider, for services rendered.
Figure 9: Payment Model for the reimbursement of Providers under the EMT Gateway
4 MONITORING AND EVALUATION OF THE FUND

Monitoring of the fund shall take place based on the administrative, financial, utilization and supervision data at various levels:

i. The NPHCDA Gateway shall be monitored based on disbursement records from facility and State level

ii. The NHIS Gateway shall be monitored based on utilization data at provider level and records of third party administrators

iii. MFOC performance shall be monitored based on disbursement records and annual reports at federal level

4.1 Monitoring of the NPHCDA Gateway

Monitoring of disbursements shall take place as follows:

4.1.1 Ex–Ante Verification:

(a) Shall take place prior to the initial disbursement of 40% funds to State Primary Healthcare Development Agencies.

(b) Shall provide satisfactory evidence to the MFOC that all participating States have made a budgetary provision for PHC in their annual budget/appropriation for the disbursement year.

(c) Shall take place for 100% of participating States.

4.1.2 Ex–Post Verification:

(a) Shall take place following the initial disbursement of 50% of funds to eligible States;

(b) Shall provide satisfactory evidence to the MFOC that:

i. All participating States have disbursed 100% of funds received to 100% of participating facilities;

ii. Facilities have been given the autonomy to run individual bank accounts, for book–keeping and accounting; and

iii. Facilities have been given the autonomy to expend resources based on needs as determined by the facility management and in accordance with the guidelines set out in the Memorandum of Understanding.

(c) Shall take place in least 10 –15% of facilities in 100% of participating states;

(d) Shall be completed no later than end of the 3rd quarter or 30th of September of the disbursement year;

(e) Completion of verification shall trigger the disbursement of the second tranche of funds due to the participating SPHCDA from the Fund; and
(f) Non-payment of facilities shall result in withholding of the 2\textsuperscript{nd} tranche of funds as outlined earlier.

4.2 Monitoring of the NHIS Gateway

4.2.1 Provider Accreditation

1. Provider accreditation under these Guidelines shall:

   (a) Take place prior to enlistment of primary and secondary providers into the free Maternal and Neonatal Health programme; and

   (b) Assess a range of basic minimum criteria (described above) required for the provision of the continuum of free MNH services and provide satisfactory evidence to the MFOC on the suitability of providers to participate in the programme;

2. Providers applying for enlistment into the free MNH programme shall undergo the accreditation assessment.

3. Providers may request a repeat accreditation 2 months after the initial assessment.

4.2.2 Ex–Post Verification of Utilization at Provider Level

1. Ex–post verification of utilization at provider level shall:

   (a) Take place to provide satisfactory validation to the MFOC, that the quantum of services reported by health facilities have been actually been rendered
   
   (b) Take place in least 10–15% of facilities in 100% of participating states
   
   (c) Be completed no later than one month following the end of each quarter

2. Completion of verification shall trigger the disbursement of funds to Third Party Administrators who shall in turn, disburse the amounts due to health facilities no later than 8 weeks following the end of the quarter

4.2.3 Ex–Post Verification of Disbursements by TPAs

   (a) Shall take place to provide satisfactory validation to the MFOC that SSHIS/TPAs have, in a timely manner, disbursed payments due to providers for the services rendered in the previous quarter

   (b) Shall take place for least 25% of SSHIS/TPAs randomly selected across the participating States and validated for at least 15% of providers in the SSHIS/TPA supervision cluster

   (c) Shall be completed no later than one month following the end of each quarter, commencing from the 2\textsuperscript{nd} quarter of the disbursement year
(d) Completion of verification, shall trigger disbursements of administrative fees due to TPAs

4.2.4 Assessment of Quality of Care at Provider Level

(a) Shall take place at least once a quarter for a selected proportion of enlisted providers to provide substantive evidence to the MFOC that the quality of care offered by providers is satisfactory

(b) Shall assess quality domains including but not limited to general and financial management, Essential Drugs Management, Outpatient services, Antenatal services, Prenatal and Postnatal Care and Skilled Birth Attendance

(c) Shall take place at two levels:
   • At *PHC Provider level* conducted by the Local Government Primary Healthcare Authority
   • At *Secondary Care Provider level* conducted by the Hospitals Management Board

(d) Shall not be linked to disbursements or provider payments. However, shall attract a penalty as outlined earlier for the provider and SSHIS/TPA in the event that quality standards are found to be below the minimum standard criteria

4.3 Impact Evaluation

(a) A rigorous Impact Evaluation (IE) shall designed to assess the impact of the fund.

(b) Conduct of the Impact Evaluation shall be the responsibility of the Federal Ministry of Health with support from the National Bureau of Statistics. The Honourable Minister may request the services of another organization to support the government agencies in design and execution the surveys

(c) The Impact Evaluation shall at the minimum, consist of baseline surveys prior or at the time of establishing the fund and an endline survey at the end of the third year of disbursement. SMART surveys may be used to judge changes in skilled birth attendance and immunization coverage.

(d) The Impact Evaluation shall be designed to measure progress in utilization of key MNH services

(i) Availability, utilization and coverage of key maternal and neonatal health services especially for the poor and,

(ii) Reduction in inequities in access and health (related) expenditures

(iii) Quality of care, in public and private health facilities

(iv) Changes in health seeking behaviour over time

(e) The Impact Evaluation shall generate lessons on the effectiveness of the fund. Evidence shall be widely disseminated and inform the review of the
guidelines. Data shall be made available to the MFOC for other key advocacy engagements
### GOVERNANCE AND OVERSIGHT

<table>

5 ANNEX: X

5.1 Monitoring of the Fund

5.1.1 Monitoring of the NPHCDA Gateway

5.1.1.1 Ex-ante Verification Mechanism

- States shall submit to the MFOC, no later than 30\textsuperscript{th} March of each year, State budgets for health that evidences appropriation for Primary Healthcare
- Budgets shall also be publicly disclosed on the website of either the State Government, its Ministry of Health or State Primary Healthcare Development Agency
- States shall be required to submit quarterly reports of utilization data for key indicators, including outpatient visits (including for children under-five), antenatal visits, skilled deliveries, postnatal visits and immunization
- The MFOC or its designated team shall assess submitted budgets and approve or deny eligibility of States no later than two weeks following the end of the first quarter of the disbursement year
- The MFOC shall disburse funds to eligible States no later than one month following the end of the first quarter of the disbursement year

5.1.1.2 Ex-post Verification Mechanism

- MFOC shall use the sampling frame of all participating facilities to randomly select at least 15\% of facilities as targets for the verification exercise
- \textit{At State level}, Independent Third Party (ITP) shall use the designated verification checklist to assess the following:
  (i) Statement of accounts to ascertain the date of receipt of funds from the Fund (Federal Level)
  (ii) Payment vouchers for evidence of disbursement of funds to facilities no later than one month following the SPHCDA’s receipt of the first tranche of funds from Federal level
  (iii) States shall be encouraged to submit quarterly reports of utilization data for key indicators including outpatient visits (including for children under-five), antenatal visits, skilled deliveries, postnatal visits and immunization
- \textit{At facility level}, ITP shall:
  (i) Establish from facility bank statements a triangulation, that amounts due to health facilities from SPHCDA were received as
due no later than one month following the SPHCDA’s receipt of the first tranche of funds from Federal level

(ii) Establish from facility’s income and expense statements that health facilities have expended resources in accordance with pre-defined guidelines as outlined in Section x and as agreed in the Memorandum of Understanding signed with the State

- Verification reports shall be collated for the State, by the ITP and be submitted to the MFOC no later than the end of the third quarter of the disbursement year
- The MFOC shall review and approve or deny funds due to States, based on the submissions, no later than two weeks following the end of the third quarter of the disbursement year
- The MFOC shall disburse funds to eligible States no later than one month following the end of the third quarter of the disbursement year
- States defaulting on payments to facilities shall be subject to penalties as outlined in Section x.

5.2 Monitoring of the NHIS Gateway

5.2.1.1 Provider Accreditation Mechanism

- The MFOC shall commission an accreditation team to conduct the assessment for all applicant providers
- Accreditation teams shall visit the applicant providers and conduct assessments based on the basic minimum criteria as contained in the designated accreditation checklist
- Accreditation teams shall submit to the MFOC, a collated list of assessed and eligible providers for approval
- The MFOC shall approve or deny eligibility of providers and designate them to a cluster under the management of a Third Party Administrator

5.2.1.2 Mechanism for Ex-Post Verification of Utilization at Provider Level:

- Participating health facilities shall report services rendered routinely and on a real-time basis using the designated smart phone application:
  - At primary level: Antenatal Visits (First, Standard i.e. 4+), Normal Delivery, Post-natal visit
  - At secondary level: Assisted deliveries, Caesarean Sections
- Data shall contain complete bio-data of beneficiaries, including name, telephone number, address and relative’s contact details
- ITP shall on a quarterly basis, no later than two weeks following the end of the quarter, aggregate data on the services rendered and submit invoices for
the total quantum of services rendered by individual facilities, for the cluster of facilities:

- **At primary healthcare level**: a service rendered shall be defined as the continuum of four or more antenatal visits, delivery attended by skilled personal and a post-natal visit within 48 hours of delivery
- **At secondary healthcare level**: a service rendered shall be defined as an assisted delivery or caesarean section referred from an eligible primary healthcare facility

- The MFOC designated ITP shall randomly select, from a sampling frame of all eligible facilities, a sample of up to 15% of health facilities for verification
- The verification team shall make phone calls to trace back beneficiaries, verify the service they assessed from the health facility and elicit their perception on the quality of care for no less than 1% of beneficiaries. The verification team shall trace back beneficiaries in person, at community level, via household visits for no less than 25% of the selected sample
- The report of verification shall be submitted by the ITP to the MFOC no later than one month following the end of the quarter
- The MFOC shall approve disbursements due to SSHIS/TPAs no later than one month following the end of the quarter
- Disbursements shall be withheld for services not verifiable by the ITP. In addition, a high degree of discordance (greater than 25%) between services reported and services verified will attract a penalty as outlined in Section x

**5.2.1.3 Mechanism for Ex-Post Verification of Disbursements by TPAs**

- MFOC designated ITP shall randomly select 25% of SSHIS/TPAs as targets for the verification exercise. Within the selected SSHIS/TPA clusters, MFOC shall randomly select 15% of providers

  (a) Verification teams shall conduct assessments of the records of SSHIS/TPAs to ascertain that disbursements have been made as and when due to providers. Accordingly, they shall review the following:

  (i) Statement of accounts to ascertain the outflow of funds from the SSHIS/TPA to the provider

  (ii) Payment vouchers as supporting evidence of disbursement of funds to facilities

1. **At provider level** verification teams shall assess the following:

  (iii) Establish from facility bank statements, a triangulation that amounts due to providers were received as due, no later eight weeks following the end of the quarter

2. Verification reports shall be collated by the ITP and submitted to the MFOC no later than one month following the end of the quarter
3. The MFOC shall, in the instance of defaulted payments by the SSHIS/TPA, apply the necessary penalties stated.

5.2.1.4 Mechanism for Assessment of Quality of Care at Provider Level

At PHC provider level

- The Local Government Primary Healthcare Authority (LGA PHCA) shall take a sample of up to 25% of enlisted PHC providers every quarter
- The LGA PHCA shall visit the sampled PHC to assess the quality of care by administering the MFOC designated quality checklist. LGA PHCA shall provide feedback to providers on improvements required at the point of administration
- The quality assessment reports and scores shall be collated by the State/Zonal focal person for the NHIS gateway and submitted to the MFOC no later than one month following the end of the quarter
- Any providers found to have sub-standard quality scores shall be penalized. For repeat infractions, SSHIS/TPAs will also be penalized along with providers.

At Secondary Care

- The HMB shall take a sample of up to 25% of enlisted secondary care providers every quarter
- The HMB shall visit the sampled secondary facilities to assess the quality of care using the MFOC designated quality checklist. HMB shall provide feedback to providers on improvements required at the point of administration
- The quality assessment reports and scores shall be collated by the State/Zonal focal person for the NHIS gateway and submitted to the MFOC no later than one month following the end of the quarter
- Any providers found to have sub-standard quality scores shall be penalized. For repeat infractions, SSHIS/TPAs will also be penalized along with providers.

5.2.2 Monitoring the Performance of the MFOC

- The assessment team designated by the Honourable Minister of Health shall review the records of activities of the MFOC using a designated checklist follows:
  (i) ITP are commissioned and mobilized no later than one month prior to the relevant completion deadline
  (ii) a. Statement of accounts shall provide evidence that the first tranche of payments due to the SPHCDA through the NPHCDA Gateway have
been duly effected before the end of the first quarter of the disbursement year

or

That the second tranche of payments due to the SPHCDA under the NPHCDA Gateway have been duly effected before the end of the third quarter of the disbursement year

(iii) Payments due to SSHIS/TPA and provider through the NHIS Gateway are effected no later than 6 weeks following the end of each quarter

(iv) Utilization and quality data generated from NHIS Gateway providers is analysed and publicly disseminated every quarter with feedback to SSHIS/TPA for disclosure to assessed facilities

(v) Mid-term report submitted no later than the end of the first month of the third quarter of every year and annual report and audit submitted no later than the end of the first month of the second quarter of the subsequent year

- The assessment team shall provide a performance assessment report to the Honourable Minister on the performance of the MFOC the end of the first month of the second quarter or end of the first month of the third quarter of the disbursement year

- The Honourable Minister shall approve or deny a performance bonus for the MFOC
6 ANNEX X

6.1 Penalties

Where established via a verification report, penalties shall be applied for the following infractions:

(a) Non-payments to health facilities by SPHCDA
   • Verification team establishes that disbursements have not gone from states to facilities in part of full. This includes part payments of funds due to facilities or payments only to a proportion of enlisted health facilities.
   • This may be intentional, due to unforeseen limitations at State level, poor records at State or facility level or administrative errors
   • Penalties applied will be dependent on the proportion of facilities that did not receive funds from the SPHCDA as per the verification report
   • Subsequent infraction or non-payment to over 25% of facilities will lead to suspension of the participating State
   • A 10% margin of error is allowed to account for administrative errors and other events beyond the control of the SPHCDA

(b) Non-payments to providers by SSHIS/TPA
   • Verification team establishes that payments have not been made by SSHIS/TPA to providers in a timely manner. This includes part payments of funds due to facilities or payments only to a proportion of enlisted providers.
   • This may be intentional, due to unforeseen limitations in SSHIS/TPA payment systems, absence of records, poorly kept records or administrative errors
   • Penalties applied for payment to less than 25% will result in withholding a commensurate percentage of SSHIS/TPA administrative fees in the first infraction.
   • Subsequent infraction or non-payment to over 25% of facilities will lead to suspension of the contract of the SSHIS/TPA. A repeat infraction for greater than 25% will result in termination of SSHIS/TPA contract
   • A 10% margin of error is allowed to account for administrative errors and other events beyond the control of the SPHCDA

(c) Services rendered by providers unverifiable
   • Verification team establishes that not all services rendered as reported by providers are traceable. This may be due to poor patient registration records, change in patient contact details (phone number,
address), intentional false reporting by provider in the form of ‘ghost patients’ or claiming more services than the patient assessed or verifier error.

- Penalties applied for payment to less than 25% will result in withholding a commensurate percentage of payment due to providers on the first infraction. Subsequent infractions will lead to withholding 50% of fees and thereafter suspension of the provider.
- A discordance of greater than 25% will results in withholding payments due to providers in part on the first office. On the second offence, providers will be suspended from the scheme and lose their accreditation on the third offence.
- A 10% margin of error is allowed to account for administrative errors and other events beyond the control of the provider

(d) Sub-standard quality of care at provider level

- Verification team establishes that not all services rendered as reported by providers are traceable. This may be due to poor patient registration records, change in patient contact details (phone number, address), intentional false reporting by provider in the form of ‘ghost patients’ or claiming more services than the patient assessed or verifier error.
- Penalties applied for payment to less than 25% will result in withholding a commensurate percentage of payment due to providers on the first infraction. Subsequent infractions will lead to withholding 50% of fees and thereafter suspension of the provider.
- A discordance of greater than 25% will results in withholding payments due to providers in part on the first office. On the second offence, providers will be suspended from the scheme and lose their accreditation on the third offence.
- A 10% margin of error is allowed to account for administrative errors and other events beyond the control of the provider

(e) Quality assessed by the LGA

- In the event that the quality of care is assessed to be below 50%, providers shall on the first infraction, receive a warning with a copy to the supervising SSHIS/TPA. On the second infraction, the provider contract shall be suspended. On the third infraction, provider accreditation will be withdrawn
- SSHIS/TPA shall be penalized in the event that over 25% of providers within their supervision cluster are assessed to have a quality score of less than 50%. On the second infraction, TPA contract shall be suspended for one quarter and terminated on the third infraction
