**NOTICE** There is a mandatory 7-day self-isolation period for all travellers on arrival to Nigeria.

## PRE-DEPARTURE

1

Have a PCR test done at an accredited (certified) laboratory in country of departure no more than 5 days (120 hours) before boarding. Only PCR tests will be accepted. Travellers with a PCR test result older than 5 days (120 hours), or with COVID-19 symptoms, will not be allowed to board.

2

Within 3 days (72 hours) before boarding, register on the Nigeria International Travel Portal ([nitp.ncdc.gov.ng](https://nitp.ncdc.gov.ng)). Complete and submit online, the Health Declaration/Self-Reporting Form and ensure the phone number and address provided are correct. Information on Diplomats and children 10 years and below must be updated in the relevant section on the portal.

3

Upload the negative PCR test results on the travel portal, then choose a Sample Collection Centre with an appointment date.

4

Payment for the repeat COVID-19 PCR test to be done 7 days after arrival in Nigeria is to be made online and a QR Code Access Report generated. It is strongly recommended that payment be made online before boarding. Payment on arrival can lead to long delays before exiting the airport.

## ON ARRIVAL

1

Travellers developing symptoms on arrival or during screening will be placed in institutional quarantine for care.

2

Undergo Port Health screening and present electronic or print-out evidence of QR Code. Passengers facing difficulties with payment on the portal should present a hard copy of the negative PCR test, completed Health Screening Form, and evidence of appointment and payment for a repeat PCR test in Nigeria.

3

Proceed to undergo a 7-day mandatory self-isolation. During isolation, avoid all physical interaction with other people (family, friends, co-workers etc).

4

During self-isolation, travellers will be monitored by Public Health Officers via telephone. Persons undergoing self-isolation and awaiting repeat COVID-19 tests are required to check their emails for updates on repeat PCR test from chosen laboratory.

5

On the 7th day after arrival, go to the selected sample collection centre and have samples taken for the repeat PCR test. You will be required to provide a valid means of identification.

6

Travellers who test positive for COVID-19 will be managed based on national guidelines for treatment. Those who test negative after 7 days will end self-isolation.

### ATTENTION

Travellers who do not go to the sample collection centre on the 7th day to have their samples taken for the repeat COVID-19 PCR test, will receive text reminders and have their details forwarded to State Public Health Department teams and the NCDC for follow-up.

Those who fail to repeat the PCR test by Day 14 of arrival may face suspension of their passports, inclusion on a travel watch list (no-fly list) or 6 months denial of international travel.

All PCR test payments go to private laboratories directly, via the payment method selected. No money is paid to the NCDC, Port Health Services or the Presidential Task Force on COVID-19.

Travellers departing Nigeria should follow their airline and destination country guidelines and requirements for COVID-19 control/prevention.

Implementation of COVID-19 prevention and control measures may cause some delay in the facilitation process. Due to anticipated delays, travellers are to arrive at the airport early; at least 1h30mins for domestic and 3h for international flights.
